Type 1 Hardware

**HW19-29202**  
Type 2 Hardware

\*ATRO's two-piece bushings allow for easier installation by eliminating the interference between the spigot and ID. Simply slide one half of the two-piece bushing over opposite spigot ends and install the bare rod, install the second half of the bushings, caps and bolts. Reduces install time by 30% to 50%.

CELEBRATING 30 YEARS
