INTRAAX®/VANTRAAX® TRI-FUNCTIONAL BUSHING

WHY CHOOSE PREMIUM ATRO PRODUCTS

ATRO has two bushing choices to replace the OEM #S-24691 Intraax/Vantraax trailer suspension bushing.

Both ATRO products offer these benefits:

- ATRO's polyurethane is impervious to chemical attack unlike rubber bushings
 - Oil & Grease
 - Calcium Chloride (Winter Salt Melt)
 - Citric Acid & Acid Based Cleaners
 - Ethylene Glycol
 - Gas, Kerosene & Diesel Oil
 - Many additional contaminants
- ATRO's polyurethane is 2-5 times stronger than rubber!

RESULT: ATRO Intraax Bushings last longer and are backed by a three year warranty

Tri-Functional Design Bushing (PB50-36000 & PB50-36001)

- The bushing has voids, similar to the OEM bushing.
- It's outside diameter (OD) 5 7/8" is similar to the rubber bushing's 6" OD.
- ATRO's bushing and the rubber bushing are compressed into the 5 1/2" ID beam hole.
- The ATRO offers the PT50-59307 installation tool, which can be used to install both ATRO's bushing and the rubber OEM bushing.

ATRO Part Number	Easy Install	Voids	Inner Pin Rotation	Bolt type	Torque
PB50-36000	No	Yes	No	Hex Head	500-550 ft. lb.
PB50-36001	No	Yes	No	Shear Bolt	Head snaps off at proper torque

ATRO POLYURETHANES

ATRO PARTS ENGINEERED | DURABLE | RELIABLE MANUFACTURED IN ST. CLAIR, MISSOURI | U.S.A.

KEY FEATURES: The Atro Difference

ATRO maintains 11 proprietary formulations, ATRO Polys, each having unique physical properties to optimize performance. Whether absorbing a shock or transferring energy, ATRO is engineered to function based on the demands of the part. ATRO provides polyurethane parts and solutions for heavy trucks.

WHAT MAKES ATRO PARTS DIFFERENT ...

The Material

11 PROPRIETARY ATRO POLY FORMULAS

Upon evaluation of the application and the purpose/function of the part, ATRO will determine which specifically formulated poly. ATRO meets or exceeds OE specs, matches or improves ride performance.

POLYURETHANES ARE DIFFERENT

- Ranging Durometer
- · Tensile Strength
- Tear Strength
- Compression Set
- Ultimate Elongation
- Rebound

Atro Polyurethane is better than Rubber

STRONGER MATERIAL

- Atro Polys are specifically engineered to the function of the part providing added durability and reliability to the suspension.
- ATRO Polys absorb energy, some deflect energy. Some maintain higher rebound or greater compression. Each part engineered for purpose and functionality.
- Rubber primarily maintains one set of properties.
- ATRO Polys maintains at least 2x or greater tensile and tear strength and 2x the elongation vs. rubber.

CHEMICALLY RESISTANT

- ATRO Polys are impervious to oil, grease, brine, cleaning solvents, hydraulic fluids and diesel fuel.
- Rubber deteriorates in similar conditions.
